

What is a Fab Lab?

Fab Lab

Fabrication Laboratory, short: Fab Lab

Initiated by MIT Center of Bits and Atoms

A prototyping platform that stimulates local entrepreneurship, education and innovation.

Global Network / Common Tools

To be a Fab Lab means connecting to a global community of learners, educators, technologists, researchers, makers and innovators- -a knowledge sharing network.

A distributed laboratory for research and invention.

It's a type of Makerspace

“Fab Lab” is just a name for a very specific Makerspace.

Outline

1 What is a Fab Lab?

Short Intro to what a “Fab Lab” is. There are specific rules to what can be “Fab Lab” and what can not.

OPTIONAL: Conditions for Fab Lab Label

OPTIONAL: The Fab Charter

2 Core Equipment

Machines, hammers, nuts & bolts. “Fab Lab” must have these.

OPTIONAL: Space

3 Personnel

A Fab Lab needs personnel to run. In a place with machines and community, there is need of maintenance of both.

4 Work Safety

A Fab Lab must be able to reflect the needs of its host community. Each Fab Lab has to be different to a certain degree.

5 Community Function

A Fab Lab must be able to reflect the needs of its host community. Each Fab Lab has to be different to a certain degree.

Conditions for Fab Lab Label?

Public Access

At least for a limited time per week.
For example “open lab day”.

Subscribe to the Fab Lab Charter

The Charter must be published
somewhere, the Website.

Common Set of Tools and Processes

If you start a project in London, you
should be able to finish it in
Palestine.

Participate in the Fab Lab Network

Collaborate, partner up with other
Labs from the network with
challenges, workshops or projects.
Attend (Video) conferences, or
contribute to the Fab Academy.

If conditions are not met, the lab must strive to meet them.

The Fab Charter

1 *What is a fab lab?*
Fablabs are a global network of local labs, enabling invention by providing access to tools for digital fabrication

4 *Who can use a fab lab?*
Fablabs are available as a community resource, offering open access for individuals as well as scheduled access for programs

6 *Who owns fab lab inventions?*
Designs and processes developed in fab labs can be protected and sold however an inventor chooses, but should remain available for individuals to use and learn from

2 *What's in a fab lab?*
Fablabs share an evolving inventory of core capabilities to make (almost) anything, allowing people and projects to be shared.

3 *What does the fab lab network provide?*
Operational, educational, technical, financial, and logistical assistance beyond what's available within one lab

5 *What are your responsibilities?*
safety: not hurting people or machines
operations: assisting with cleaning, maintaining, and improving the lab
knowledge: contributing to the community and its growth

7 *How can businesses use a fab lab?*
Commercial activities can be prototyped and incubated in a fab lab, but they must not conflict with other uses, they should grow beyond rather than within the lab, and they are expected to benefit the inventors, labs, and networks that contribute to their success

Core Equipment

Computer Controlled Subtractive Machining

- Laser Cutter
- CNC Large Scale Wood Router or Soft Materials Mill
- Vinyl Cutter
- Precision Desktop Milling Machine

Computer Controlled Additive Machining

3D Printers

Electronics

Fully equipped electronics workbench and supplies

Communications / Network

connection with Fab Lab Video Conference Server

Infrastructure, cf. Excel List

Space

How much space is available

It is important to know, how much space is available. What is the room structure?

Furnitute?

Shelves, tables, chairs, workbenches etc.

Structure?

Where are air vents? Power outlets? Etc.

Room divion / dirty work / clean work / fumes

Different work stations should be divided. When sanding dust will go to other tools. Some materials will produce fumes that might be harmful.

VR Area

Mobile Furniture

Repurposed Room

3D Printers

Large CNC

Electronics

Personnel

Such a lab needs Personnel

At least one technician

Machines, tools, cspace need to be tidy and clean. There has to be one person taking care of that. This person can also function as a mentor.

Champion

Personnel must be trained in work safety.

Community Function
